Matching Ceiling: 

## Paneled MDRF

MDRF is a great way to have the raised panel look but with half the cost. Choose from many different panel options and colors. Cabs are finished with conversion varnish. Rub through and glazing is available.

**Base MDRF Cab:**  
**Flat Matching Ceiling**  
**Matching Paneled Ceiling:**  
**Non-Standard Color:**  
**Add Glazing:**  
**Custom Match Color:**

Our standard raised panel option is shown here below. Each wall will have 4 panels. Ceiling will be white. There are dozens of stains to choose from. Included in the base raised panel package are the following wood species:

**Cherry | White Oak | Red Oak | Birch Maple | Hickory | Ash | Clear Pine | Knotty Pine**

The possibilities are truly endless. We can match profiles, provide exotic woods, and even color match stain. Custom cabs will need to be priced per specifications. See sales rep for details.

## Raised Paneled Hardwood

Standard Raised Panel Package:

Flat Matching Ceiling:

## Gates & Doors

# Accordion Gates

Every elevator has to have a gate or door on the cab to keep the user from being able to touch the shaft. The standard accordion gate has solid panels that comes in 9 different laminate colors. Light Curtain screens and hard hinges are standard safety features that ensure the safe use of your elevator.

Accordion Gates (standard)

## Optional Colors

Chalk

Black

Mahogany

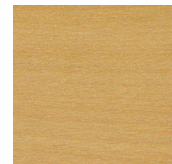

Walnut

Cherry

Antique white

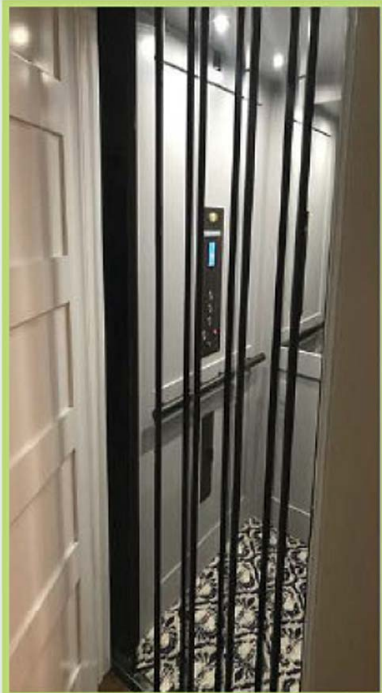

Birch

# Accordion Gates

## Optional Upgrades

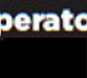

If your looking to enhance the look of your accordion door, look no further. You can add wood, metal, or even clear panels to the design. Take it to the next level with automatic operation.

**Perforated Aluminum**  
Silver:   
White or Black:   
Bronze: 

**Power Gate Operator**  

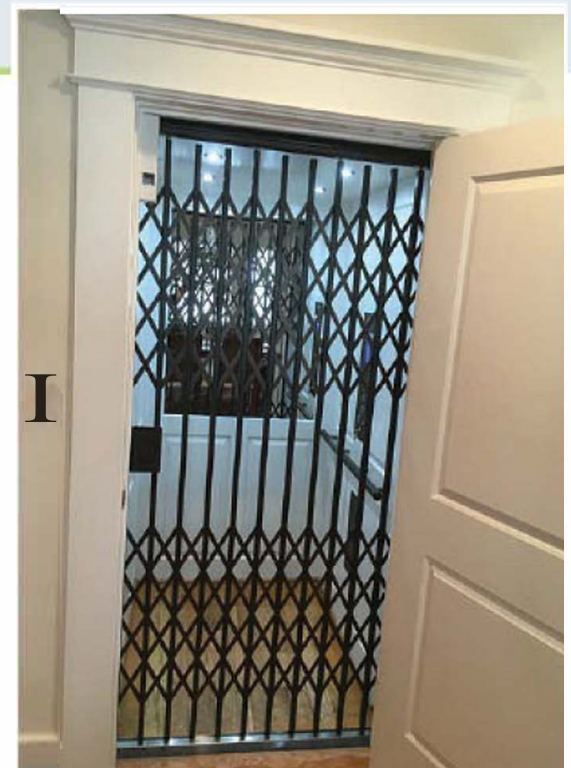

# Scissor Gates

Want that nostalgic look of elevators from the golden age? Scissor gates are very classy and traditional. With the addition of light screens, scissor gates are no longer viewed as dangerous to small hands or fingers. If any object crosses the light curtain beyond the gate, the elevator stops automatically.

..Prices below are for a single gate. Some shaft designs require more than one door on your elevator platform which means you have to multiply the price by the number of gates you have.

**Black Scissor Gate** :   
**Bronze Scissor Gate** :

## Automatic Bifold Door

The Automatic Bi-fold Door option is like nothing else on the market. Fully automatic doors replace the traditional accordion gate. They come in your choice of Architectural White or Brushed Stainless Steel.

\*FYI...Pricing is for a single door. Some shaft designs require more than one door on your elevator platform which means you have to multiply the price by the number of doors you have.

Auto Bi-fold Door Stainless Steel:

## Slimline Automatic Doors

Slimline doors are an amazing product. They give your home elevator a true office building elevator feel. Perfect for people who want fully automatic operation of the entire elevator. With this option, you can choose to have the doors at every landing, or just on the cab itself in lieu of any gates.

See the video of these door in action. Follow the link below:  
[www.youtube.com/watch?v=tRWYk3tBcyY](https://www.youtube.com/watch?v=tRWYk3tBcyY)

\*\* Prices below are for a single door. Some shaft designs require more than one door on your elevator platform which means you have to multiply the price by the number of doors you have.

**Auto Slim on Cab Only**  
Unfinished Steel: [REDACTED]  
Painted White or Black: [REDACTED]  
Stainless Steel: [REDACTED]  
Glass: [REDACTED]

**Auto Slim at Landing**  
(Price is per landing)  
Unfinished Steel: [REDACTED]  
Painted White or Black: [REDACTED]  
Stainless Steel: [REDACTED]  
Glass: [REDACTED]

**30" Slim Door**  
(Per door): [REDACTED]

**92" Tall Slim Door**  
(Per door): [REDACTED]

**Non-Standard Paint**  
(Per door): RAL Color

### Shaft Requirements for Slimline Doors

\* Door wall of shaft dimension needs to be 59 inches for 36" Slimline doors. 55" for 30" slimline doors.

\* Overhead needs to be minimum of 104"

\* 10" pit depth is required.

\*\* If you choose to have hoistway Slimline doors, you must also purchase the cab door as well. The system does not work without the door on the cab as well.
